1st Technology

Latest Tech Gadgets

Drone

Introduction

A drone is designed for **aerial photography, exploration, and adventure**. It combines **powerful performance, and intelligent flying features**.

Key Features

- **Camera:** Many drones are equipped with high-resolution cameras for aerial photography and videography.
- **flight time:** Typically ranges from 15 to 45 minutes depending on battery size.
- **Range:** Varies from a few kilometers to more than 10 kilometers for advanced drones.
- **Sensors:** Include GPS, gyroscopes, accelerometers, and obstacle detection systems.
- **Design:** Compact, foldable, and lightweight designs make them portable.
- **Battery:** Rechargeable lithium-ion batteries for longer flight durations.

Advantages of Drone

1. Aerial Photography – Capture stunning photos and videos from the sky.
2. Surveillance – Used in security, disaster management, and defense.
3. Agriculture – Monitor crops, spray fertilizers, and improve productivity.
4. Delivery – Transport lightweight goods quickly and efficiently.
5. Exploration – Reach remote or dangerous areas safely.

Drone Technology Diffrences

Updation in Drone

Drone Type	Camera Quality	Flight Time	Range of Flight
Basic	Low	10-15 min	1-2 Km
Advanced	Good	30 min	5-10 Km
Professional	Best	1 hr	15-20 Km

Uses

- **Photography & Videography:** Widely used in filmmaking, weddings, and events
- **Disaster Management:** Assessing flood, earthquake, or fire-hit areas.
- **Military:** Reconnaissance, surveillance, and tactical operations.
- **Logistics:** Package deliveries and medical supply drops.
- **Research:** Wildlife monitoring, environmental studies, and mapping.

Prices (Limited time offer)

- Begginer level: ~~$400~~ $250
- Advanced level: ~~$700~~ $550
- Professional level: ~~$1200~~ $1000

2nd Technology

Smart Watches

Introduction

A smartwatch is a wearable device worn on the wrist that not only tells time but also provides smart features like health monitoring, notifications, and connectivity with smartphones. It is a combination of traditional watches and modern computing technology, making it an essential gadget for fitness enthusiasts, professionals, and tech lovers..

Key Features

- Display: Touchscreen, usually AMOLED or LCD.
- Health Tracking: Heart rate monitor, SpO_2 sensor, sleep tracking, step counter.
- Connectivity: Bluetooth, Wi-Fi, and sometimes LTE.
- Notifications: Calls, messages, and app alerts synced from phone.
- Battery Life: Ranges from 1 day (high-end) to 7–14 days (basic models).
- Water Resistance: Many models are splash-proof or waterproof.

Advantages of Smart Watches

1. Fitness & Health Monitoring – Track workouts, calories, and daily activity.
2. Instant Notifications – No need to check your phone frequently.
3. Emergency Assistance – Fall detection, SOS alerts, and GPS tracking.
4. Customization – Changeable watch faces and straps.
5. Entertainment – Play music, control camera, and use apps.

Smart Watches Diffrences

Updation in Drone

Watch Type	Battery Life	Water Resistance	Features
Basic	Notifications, step count	No	
Fitness	5-6 days	Yes	Health & fitness tracking
Advanced	8-10 says	Yes	GPS, calls, apps, music, camera

Uses

- **Health & Fitness:** Track exercise, monitor heart rate, and analyze sleep.
- **Professional Use:** Get reminders, alarms, and email notifications.
- **Safety:** Location tracking for kids and elderly people.
- **Convenience:** Make calls, listen to music, and pay via smartwatch.

Prices (Limited time offer)

- **Basic:** ~~$150~~ $100
- **Fitness:** ~~$300~~ $200
- **Advanced:** ~~$400~~ $300
